Operating the Jungheinrich EJE 120

Understanding how to operate the EJE 120 effectively is crucial for maximizing productivity and ensuring safety. Here are some essential operating tips:

Pre-Operation Checks

Before using the EJE 120, operators should conduct a series of pre-operation checks:

- Inspect the truck for any visible damage or wear.
- Check the battery charge level and ensure it is adequately charged.
- Test the brakes and steering for proper functionality.

- Ensure that the forks are in good condition and operate smoothly.

Operating Procedures

Once pre-operation checks are complete, operators can proceed with the following steps:

1. Starting the Truck: Insert the key and turn it to the "on" position. Ensure the emergency stop button is disengaged.
2. Maneuvering: Use the ergonomic handle to steer the truck. The EJE 120's compact design allows for easy navigation in tight spaces.
3. Lifting and Lowering Loads: To lift, pull the lift control lever. To lower, push the lever down gradually. Always ensure that the load is stable before moving.
4. Transporting Loads: When transporting, keep the load as low as possible to maintain stability and visibility. Always adhere to weight limits.

Maintenance of the Jungheinrich EJE 120

Regular maintenance is vital for keeping the EJE 120 in optimal condition. The manual outlines essential maintenance practices that should be followed:

Daily Maintenance Tasks

Operators should perform the following daily checks:

- Inspect the battery for leaks and ensure terminals are clean and secure.
- Check tire pressure and inspect the tires for wear.
- Ensure that all controls and safety features are functioning correctly.

Weekly and Monthly Maintenance Tasks

In addition to daily checks, the following maintenance tasks should be performed weekly or monthly:

1. Clean the truck, removing dirt and debris that may hinder performance.

2. Inspect the forks for any signs of bending or damage.
3. Lubricate moving parts as specified in the manual.
4. Review the battery's water levels (if applicable) and top off as necessary.

Professional Servicing

It is recommended to have a qualified technician perform a comprehensive inspection and service of the EJE 120 at least once a year. This will include a thorough evaluation of electrical systems, mechanical components, and safety features.

Troubleshooting Common Issues

Despite regular maintenance, issues may occasionally arise while operating the EJE 120. Here are some common problems and their solutions:

Problem: Truck Does Not Start

- Possible Causes:
 - Battery is discharged.
