Key Components of the Killer Instinct Lethal 405

Understanding the parts of the Lethal 405 is crucial for effective use and maintenance. The following sections outline the key components of the crossbow and their respective functions.

1. Stock

- Material: Typically made from durable composite materials to withstand harsh conditions.
- Function: Provides stability and support while aiming and shooting. The design is ergonomic, improving comfort for extended use.

2. Limbs

- Material: Usually constructed from high-strength fiberglass or laminated wood.
- Function: The limbs store and release energy when the crossbow is shot. The Lethal 405 features high-performance limbs that contribute to its impressive speed and power.

3. Bowstring and Cables

- Material: Made from synthetic fibers, ensuring durability and minimal stretch.
- Function: The bowstring connects the limbs and transfers energy during the shot. Proper maintenance of the string and cables is vital for optimal performance.

4. Trigger Mechanism

- Components: Includes the trigger, safety mechanism, and sear.
- Function: The trigger controls the release of the bowstring. The safety mechanism ensures the crossbow cannot be fired unintentionally.

5. Front Grip and Forearm

- Design: Often features textured grips for better handling.
- Function: Provides stability while aiming and shooting. The forearm protects the user's hand from the bowstring during firing.

6. Scope and Mounting System

- Type: Typically features a multi-reticle scope for enhanced accuracy.
- Function: Aids in targeting and improving shooting precision. The mounting system ensures the scope remains securely attached.

7. Quiver

- Material: Usually made from durable plastic or composite materials.
- Function: Holds and protects the arrows for easy access while hunting.

8. Arrows

- Specifications: Standard arrows for the Lethal 405 typically measure 20 inches in length.
- Function: Designed for maximum accuracy and penetration. Selecting the right arrows is essential for achieving the desired performance.
