For situational judgment questions, candidates can use the STAR method (Situation, Task, Action, Result) to structure their responses:

- Situation: Describe a relevant situation.
- Task: Explain the task or challenge faced.

- Result: Share the outcome and what was learned.

## **4. Stay Calm and Focused**

Anxiety can hinder performance. Candidates should practice relaxation techniques, such as deep breathing, to help maintain focus during the test.

## **5. Review and Revise Answers if Possible**

If the test allows for it, candidates should take the time to review their answers before submitting. This can help catch any mistakes or unclear responses.
