Amidst the chaos of battles and quests, healing plays a crucial role in the survival and success of any team. This guide will provide insights on healing mechanics, the different healing classes, and effective strategies to maximize your healing potential in New World.

## Understanding Healing Mechanics

Healing in New World is primarily achieved through the use of specific weapons and abilities that restore health to players. The main healing weapon available is the Life Staff, which allows players to cast various healing spells to support themselves and their allies.

## Types of Healing

There are two main types of healing in New World:

1. Direct Healing: This type of healing restores a specific amount of health immediately. It is useful in critical moments when a teammate is about to fall in battle.
2. Over-Time Healing (HoTs): These healing effects are applied over a duration, slowly restoring health. They are beneficial for maintaining health during prolonged engagements.

## Healing Sources

Healing can come from various sources in New World, including:

- Life Staff Abilities: The core of healing in New World, with a variety of spells designed for direct and over-time healing.
- Consumables: Items such as potions, food, and elixirs can provide instant healing or health regeneration effects.
- Passive Abilities: Some classes or builds may have passive abilities that enhance healing output or provide additional healing effects.

# Life Staff Overview

The Life Staff is the primary weapon associated with healing in New World. Mastery of this weapon is essential for any healer in the game.

## Key Abilities

The Life Staff comes equipped with various abilities that cater to different healing needs. Here are some key abilities to consider:

1. Light Heal: A quick cast that restores a small amount of health to a single target. It is ideal for quick burst healing.
2. Sacred Ground: A powerful area-of-effect (AoE) heal that creates a healing zone on the ground. Allies standing in this zone receive health over time.
3. Divine Embrace: A strong single-target heal that has a cast time. This ability is crucial for saving teammates in dire situations.
