Understanding Socratic Education According to Christopher Bruell

The Role of Dialogue in Socratic Education

participatory experience.

Intellectual Humility and Self-Examination

Bruell identifies this process as essential for moral and intellectual development, enabling learners to progress beyond superficial understanding toward deeper insight.

The Historical and Philosophical Foundations of Socratic Pedagogy

Bruell describes how Socrates employed this technique not to impart knowledge directly but to expose contradictions and stimulate critical thinking. This method encourages learners to reconsider their assumptions and strive for conceptual clarity, forming the backbone of Socratic education.

Philosophical Goals of Socratic Education

Bruell highlights that the ultimate goal of Socratic education is the pursuit of virtue and wisdom. It is not purely an intellectual exercise but a moral endeavor that seeks to align knowledge with ethical living.
